

YEAR 7 CURRICULUM 2021-22

Excellence, Endeavour, Respect

THE WOLFRETTON WAY

The purpose of our curriculum at Wolfreton, is rooted in our Mission Statement and our core Values. It has been designed to enable each individual to **achieve and fulfil their potential** and in doing so, to prepare them to **achieve success in the future** and **in their lives beyond school**.

We aim to enable every young person to **fulfil their academic potential**, providing the foundations for them to excel in all that they do and to leave prepared to achieve all their ambitions.

Our approach to achieving this is underpinned by what we call **The Wolfreton Way**; the promotion of what we judge to be important in life – the principles or standards of Excellence, Endeavour and Respect.

EXCELLENCE – We aim to inspire – to be the best we can be
ENDEAVOUR – We promote the qualities of determination and courage
RESPECT – We are firm advocates of friendship and equality

This ethos of ‘Excellence, Endeavour, Respect’, has informed the principles we identified to lie **behind our curriculum**.

We have and continue to establish a curriculum based on 4 key principles. A curriculum that will ensure that the education we provide is:

1. Ambitious	2. Broadly based and balanced	3. High quality “rigorous, coherent, sequenced”	4. Stimulating and demanding
Designed to develop ENDEAVOUR	Designed to develop RESPECT	Designed to deliver EXCELLENCE	Designed to ensure we are Igniting Fires
To promote the qualities of determination and courage	We are firm advocates of friendship and equality	We aim to inspire – to be the best that we can be	and Expanding Horizons as we grow

Our strategic intent therefore encapsulates our ethos (The Wolfreton Way) and principles:

To offer an **ambitious** curriculum that is broadly based and balanced aiming to deliver a **high-quality** provision with a range of pathways that provide a **stimulating and demanding** education for students of all abilities -

'Igniting Fires and Expanding Horizons.'

This booklet provides a summary of the knowledge and skills that form our Year 7 Igniting Fires Curriculum.

Year 7 Curriculum Map 2021-22

Subject	Autumn 1	Autumn 2	Spring 1	Spring 2	Summer 1	Summer 2
English	Myths and Legends Greek and Roman myths	The continuation of Myths and Legends. The Gothic. The history of The Gothic in Literature. Study of 'Flesh and Blood' Gothic writing	The Gothic. The history of The Gothic in Literature. Study of 'Flesh and Blood' Gothic writing	Growing Up. The reading and study of fiction and non fiction over time periods, poetry, autobiographical writing, speaking and listening.	The continuation of Growing Up. Dystopia. In depth study of 'The Giver' Analysis of non-fiction	Dystopia. In depth study of 'The Giver' Analysis of non fiction. Writing to express a viewpoint
Maths	S1 - Charts and graphs, N1 Place Value, G1 Conversions, N2 Calculations for reasoning	A1 Introduction to algebra, N3 Types of Number,	S2 Probability Introduction, N4 Fractions, G2 Simple Transformations	G2 Transformations, R1 Unit Pricing, A2 Brackets	N5 Rounding and Estimating, R2 Ratio in Real Life, G3 2D Shapes	G3 2D Shapes, A3 Substitution and project
Science	1. Particulate nature, 2. Space, 3. Ecology			1. Reproduction 2. Inheritance, Evolution and Variation, 3. Forces		
History	Historical skills and terms, Pre 1066: Romans, What changed in 1066: Who should be King? Gate Fulford and Stamford Bridge.	Norman Conquest, Castles, Norman methods of control.	Medieval Life and Religion, Magna Carta, Thomas Beckett and Black Death	Peasant's Revolt and Hundred Years War	War of the Roses, Tudors: Henry VIII, Edward and Mary	Elizabethan England
Geography (PLACE)	Why Geography Matters?	Asia	Europe	Antarctica	Oceania	Africa
French	Pronouncing and developing accent	My family and my life	School Life	Hobbies and sports	Places to live	Travel and going out
Spanish	Pronouncing and developing accent	My family and my life	School Life	Hobbies and sports	Places to live	Travel and going out
Art					Art from other cultures - African and Native American Art	
Music – Units can rotate	Using Your Voice/Performance	Rhythms of the World	The Keyboard	The Guitar/Ukulele	Mysterious Music	Programme Music
Drama	What is Drama?	Spooky Tales	Mime and Movement	Peer Pressure	Midsummer Night's Dream	Fairy Tales and the Terrible Fate of Humpty Dumpty - script
Computing	IT Skills	Multimedia Products	E-Safety	Small Basic Shapes	Graphics Editing	Small Basic Quiz / E-Safety
PE Girls Games	Hockey	Netball	Football	Netball	Fielding and Striking	Tennis
	Netball	Hockey	Netball	Football	Tennis	Fielding and Striking
PE Girls PE	Dance	Badminton	Gymnastics	Team Games	Athletics	
	Badminton	Dance	Team Games	Gymnastics		
PE Boys Games	Rugby				Fielding and Striking	Tennis
	Football				Tennis	Fielding and Striking
PE Boys PE	Gymnastics	OAA/Team Games	Badminton	Basketball	Athletics	

	OAA/Team Games	Gymnastics	Basketball	Badminton		
Religious Studies	Christianity		Islam	Sikihism		Buddhism
Design and Technology - rotation	Resistant Materials - Rotation 1 Lamp project Wood, Acrylic, manufacturing and electrical systems		Textiles - Rotation 2 Juggling animal (Textile) properties of natural and synthetic materials	Food and Nutrition Rotation 3 Cooking & Nutrition: Personal hygiene/equipment/healthy eating/food preparation skills/Fairtrade/Seasonal and locally sourced foods.		
PSHE	Introduction to PSHE	British Values	Healthy Relationships	Careers	Esafety	Healthy Lifestyles

ENGLISH

So much more than just a story

To inspire a passion for words and a love of language which will allow you to engage with the world in which we live. To provide you with skills to enter into debate on important social, moral and political issues, through a range of stimulating texts.

SoL	Myths and Legends	The Gothic	Growing Up	Dystopia
Knowledge	<ul style="list-style-type: none"> • Context of Greek Mythology • Tradition of story telling • Names and stories • Themes: morals, behaviour, lessons, explanations of creations 	<ul style="list-style-type: none"> • Conventions of the gothic tradition <i>Macabre, vampires, supernatural, death, blackness, over-reaching</i> • Conventions of the play form • Context of texts 	<ul style="list-style-type: none"> • Difference between fiction and non-fiction • Autobiography • Standard English • Formality / informality • Audience and purpose 	<ul style="list-style-type: none"> • Recognition of genre conventions • Understanding of influence of context and purpose • Knowledge of the world around us and environmental issues • Understanding of structural devices • Knowledge of a range of public speakers • How persuasive devices are used
Skills	<ul style="list-style-type: none"> • Use of archetypes • Use of sentence types for effect • Emphasis on sentences structures • Emphasis on vocabulary 	<ul style="list-style-type: none"> • Use of Gothic conventions • Emphasis on vocabulary • Structure – using a hook and / or twist 	<ul style="list-style-type: none"> • Presentation. • Standard English • Vocabulary use • Developed answers to questions. 	<ul style="list-style-type: none"> • Evaluation of texts. • Inferences and interpretations • Persuasive devices used to convey a thoughtful argument • Sentence types have been employed effectively

English Assessment and Feedback

Students are formatively assessed throughout each topic using Low Stakes Testing and Assessment for Learning strategies.

Year 7 are assessed early on in their English lessons through a spelling test and reading test, which is marked by the SEN team and has informed our intervention procedures with any weaker readers in this year group.

Students complete an assessment at some point within the scheme of learning (usually towards the start/middle of the scheme) based on the topic they have been studying. This varies from scheme to scheme, but some assess writing skills, some reading skills and if the scheme allows for such, some assess both with two different assessments.

They also complete an end of year exam covering all topics studied in that year. There will be 6 summative assessments throughout Years 7, 8 and 9.

We use coloured pens as outlined below:

Green pens – teacher marking and feedback

Red pens – student response to TIFs or MRI work following on from a key marked piece.

As a department, we believe that marking and feedback should:

- Provide student, teacher and parents with regular feedback.
- Offer value to and support individual student's efforts.
- Highlight achievements and common errors to allow new targets to be accurate and attainable.
- Offer encouragement and be clearly understood by the student in order to support the development of self-confidence.
- Demonstrate high levels of expectations of effort and commitment.
- Be in line with whole school expectations.

Students will be encouraged to seek guidance if they are unsure about any aspect of their work. It is the responsibility of the teacher to ensure that their feedback creates or challenges understanding with the students. To this end each key marked piece feedback should be followed by a student's response.

All marked or checked pieces of work will include corrections to literacy using the Wolfreton codes.

Key Marked Work: Key Stage 3

- Completed in normal exercise books and with a blue sheet attached that clearly identifies the marking criteria, the marking will contain both internal comments on the piece of work as well as summative WWW(What Went Well) and TIFs(To Improve Further). The key marked piece will be the culmination of the objectives set out on the medium-term plan for this topic. It will focus on strands of the curriculum knowledge and skills that have been taught in this unit.
- For extended pieces of work a section of the work will be marked in detail for the student to improve upon.

- The What Went Well will highlight areas that the young person has mastered or shown progress in.
- The TIF will be diagnostic, sometimes worded in the form of a question to allow the student to improve upon a certain area.
- Time will be given for the young person to respond to the TIF in the form of the MRI (My Response Is).

MATHS

The possibilities are infinite

To spark numerical ingenuity, confidence and fluency by creating, challenging and championing your mathematical understanding.

SoL	S1 – Charts and Graphs	N1 – Place Value	G1 – Conversions	N2 – Calculations for reasoning	A1 – Introduction to Algebra
Knowledge	<ul style="list-style-type: none"> What is a bar chart? What do we mean by frequency? How do scales work? When would we use each type of bar chart? When would we use a simple bar chart and when would we use a comparative / composite bar chart? Can the same data be represented in different ways? What can scatter graphs tell us? What can't they tell us? How do pie charts represent the results of a survey? When can we convert between pie charts, bar charts and scatter graphs and when can't we? Why? 	<ul style="list-style-type: none"> Understand why we call the columns hundreds, thousands etc and their relative size Why do the digits simply move when we \times or \div by 10 etc? What does equals actually mean? What does the term inequality mean? Why is -3 bigger than -4 when 4 is bigger than 3? How does ordering in decimals work? Why is 1.25 half way between 1.2 and 1.3? 	<ul style="list-style-type: none"> What does it mean for there to be 100cm in a m? Understanding of the terms length, mass and capacity How do we label angles and line segments? What does it mean for lines to be parallel or perpendicular? How are types of triangles the same? How are they different? What questions can we ask to distinguish which shape is which? How are types of quadrilaterals the same? How are they different? What questions can we ask to distinguish which shape is which? 	<ul style="list-style-type: none"> Why is $a + b$ the same as $b + a$? Why is $a - b$ not the same as $b - a$? Why are they related? Why does the method of column addition work? Why does borrowing work? Why is $a - (b + c)$ the same as $(a - b) - c$? How does division as sharing lead to method of short division? 	<ul style="list-style-type: none"> Why does algebra use letters? What do we mean by like terms? What about ab and ba? Why is $y + y = 2y$ and $y \times y = y^2$? How is this linked to adding and multiplying numbers? Why do we add the powers when we multiply? How is simplifying divisions like simplifying fractions?
Skills	<ul style="list-style-type: none"> Bar charts Scatter Graphs Pie Charts 	<ul style="list-style-type: none"> Place Value Ordering \times/\div by powers of 10 Maths symbols 	<ul style="list-style-type: none"> Conversions Geometric definitions 	<ul style="list-style-type: none"> Adding and Subtracting integers Adding and subtracting decimals Short division 	<ul style="list-style-type: none"> Collecting like terms Algebraic multiplication Simplifying divisions

SoL	N3 – Types of Number	S2 – Probability Introduction	N4 – Fractions	G2 – Simple Transformations	R1 – Unit Pricing
Knowledge	<ul style="list-style-type: none"> • What are factors? • What is the most efficient way of listing them? • How are factors and multiples linked? • Why would we want to find the HCF and what might it be used for? • Why would we want to find the LCM and what might it be used for? • What is the relationship between the HCF and LCM? • What is an arithmetic sequence? • What is a geometric sequence? • What is a Fibonacci sequence and why is it so interesting? • What do we mean by inverse and what is the inverse of squaring, cubing, square rooting etc? • Can we find the square root of any number? 	<ul style="list-style-type: none"> • What do we mean by chance? • What influences probability? • What do we mean by a one in six chance? • Why would this not always be the case? • Why do the probabilities of an event happening and not happening add up to 1? • What would be a valid probability? What would definitely be wrong? 	<ul style="list-style-type: none"> • What is the relative size of unit fractions? Why? • When is one of two parts not a half? • How many ways can you convince me that $\frac{8}{9}$ is larger than $\frac{7}{8}$? • Why can we not add the numerator and denominator? • Why can we multiply across? • Why does KFC work? 	<ul style="list-style-type: none"> • What does reflection mean and how do mirrors work? • Why is reflectional symmetry related to reflection? • What is rotational symmetry and how is it different to reflectional symmetry? • How and why does the distance from the centre to the new shape change? • What do the terms translation, rotation, reflection and enlargement mean and how are the original shape and the image related in each case? 	<ul style="list-style-type: none"> • What does it mean to write a quantity as a fraction of another? • What does best value mean? • What do we mean by a unit? • What do we mean by proportion?
Skills	<ul style="list-style-type: none"> • Factors • Multiples • Patterns • Powers and roots 	<ul style="list-style-type: none"> • Language of probability • Probability of simple events • Probability of not 	<ul style="list-style-type: none"> • Equivalent/ simplify • Ordering • Decimals to fractions • Four operations with fractions 	<ul style="list-style-type: none"> • Symmetry • Translation • Rotation • Enlargement 	<ul style="list-style-type: none"> • Quantities as fractions of another • Unit pricing

SoL	N5 Rounding & Estimating	A2 Brackets	R2 Ratio in Real life	G3 – 2D Shapes	A3 - Substitution
Knowledge	<ul style="list-style-type: none"> Why would we want to round? Why is 5 so important? Why do we round 5 up? Why do we ignore proceeding zeros but not trapped zeros? Why do we need to replace digits before the decimal with a zero but not after? 	<ul style="list-style-type: none"> What does $2(x + 1)$ mean? Why do we multiply the terms? Why is factorising called factorising, how is it linked to factors? Can we factorise in more than one way? 	<ul style="list-style-type: none"> What is a ratio? What does a ratio of 1:3 mean? What does a ratio of 1:3 look like? Where might we see ratio in real life? How do map scales work? Why is simplifying a ratio the same method as simplifying a fraction? What does it mean to share a quantity in a ratio? 	<ul style="list-style-type: none"> Understand vocabulary relating to plane figures – closed, vertex, vertices, edges, diagonals, and polygon. What criteria sets different quadrilaterals apart? Why? Where do the area formulae come from? Why do we multiply the length and width for the area of a rectangle? Why do we halve the area of a rectangle to get the area of a triangle? What is pi? 	<ul style="list-style-type: none"> Why do we want to be able to write a general expression? Writing expressions from words Why is $2a + 3$ different to $2(a + 3)$ and which one is used when? What do we mean by substitute and how is it linked to sport? What do we mean by generating a sequence? Substitute values into simple expressions and those involving powers, know the correct order for solving $2x^2$.
Skills	<ul style="list-style-type: none"> Rounding Estimating 	<ul style="list-style-type: none"> Expand single brackets Factorise single brackets 	<ul style="list-style-type: none"> Map scales Simplifying and equivalent Sharing using a diagram 	<ul style="list-style-type: none"> Quadrilaterals Triangles Circles 	<ul style="list-style-type: none"> Writing expressions Substitution Generating sequences

Maths Assessment and Feedback

All students are formally assessed at the end of each half term. Assessments for Years 9 and 10 are in the penultimate week of the half term and Years 7 and 8 in the final week. Revision checklists are sent by email to parents in the week before the assessment.

Assessments are cumulative in nature i.e the end of half term 3 will test skills learnt in half term 1, 2 and 3.

Assessments are marked by the class teacher and each young person receives a personalised red, amber, green checklist to show their strengths and weaknesses and a selection of improvement questions with worked examples.

We informally assess students at the end of each lesson through the key questions to ensure they are acquiring the skills and knowledge set out in our curriculum. Students are also informally assessed through their class work home learning task (every three weeks) and provided with feedback to support them in preparation for the end of half term assessment.

Regular marking of work is a departmental responsibility that is fundamental to the process of teaching and learning.

As a department, we believe that marking and feedback should:

- Provide student, teacher and parents with regular feedback.
- Offer value to and support individual student's efforts.
- Highlight achievements and common errors to allow new targets to be accurate and attainable.
- Offer encouragement and be clearly understood by the student in order to support the development of self-confidence.
- Demonstrate high levels of expectations of effort and commitment.
- Be in line with whole school expectations.

Maths lends itself well to instant feedback and students may mark their own or others work in order to develop assessment for learning techniques. Students will be encouraged to seek guidance if they are unsure about any aspect of their work. It is the responsibility of the teacher to ensure that their feedback creates or challenges understanding with the students. To this end each piece of feedback should be followed by a student response.

Books/ Classwork

The majority of classwork will be marked by the students throughout the lesson. This will be checked by staff and whole class or individual feedback will be provided when common errors occur. This feedback will be actioned as a starter in a subsequent lesson. The expectation is that book marking will coincide with the marking of homework.

Assessments/ Key Marked Work/ PPEs

These will take place for all year groups according to the departmental Assessment calendar. Staff will mark these according the mark scheme and provide internal TIFs to help students improve their work. A blue KMP sheet will be completed with WWW and TIF statements linked to the learning outcomes. Students will be given sufficient time in a subsequent lesson to discuss their work and to complete feed forward activities.

SCIENCE

Science is organised curiosity; always question, always wonder!

To stimulate a lifelong curiosity which allows you to understand and contribute to the wider world and to begin the journey to reshape the world around you.

SoL	Particulate nature	Space	Ecology	Chemical reactions	Cells
Knowledge	<ul style="list-style-type: none"> Matter Pure / impure substances Changes of state Sublimation and diffusion Brownian motion Mixture Separating mixtures – chromatography, filtering, evaporation, distillation 	<ul style="list-style-type: none"> Describe the features of the sun and other stars Describe the features of our Solar System Explain the effects of gravity on the Solar System Explain the phenomena of days and seasons Explain how craters formed on the Moon Describe the phases of the Moon Explain why eclipses can occur Evaluate Man's chances of effective space exploration Explain how Mankind has observed space and other galaxies 	<ul style="list-style-type: none"> Ecological definitions Give examples of abiotic and biotic factors Interpret food chains and webs Create and interpret pyramids of numbers and biomass Estimate population sizes Evaluate the effects of a growing human population Evaluate the relationship between insects and food security Describe the process of eutrophication Describe the process of bioaccumulation 	<ul style="list-style-type: none"> Physical and chemical reactions – reversible and irreversible Reactivity series including the introduction of word equations Types of reaction – displacement, exothermic and endothermic reactions, combustion, thermal decomposition, oxidation, reduction, neutralisation Reaction rates and catalysts pH scale and indicators Reactions of acids and metals 	<ul style="list-style-type: none"> Labelling cells Describing function of cell organelles Labelling microscopes Describing how to use a microscope Explaining how cells, tissues and organs are arranged Describing the process of diffusion, Labelling the skeleton Describing the function of the skeleton Explaining how muscles and joints facilitate movement
Skills	<ul style="list-style-type: none"> <u>Literacy:</u> (i) development of vocab – see key word list; (ii) write up of superhero (see below); (iii) write up of lap report; (iv) describing states 	<ul style="list-style-type: none"> <u>Literacy:</u> (i) development of vocab – see key word list; (ii) write up of investigation of moon craters if activity is completed <u>Numeracy:</u> (i) Calculating mass, weight and gravity. 	<ul style="list-style-type: none"> <u>Literacy:</u> (i) development of vocab – see key word list; (ii) write up of investigation (iii) evaluating the effect of humans on the environment <u>Numeracy:</u> (i) applying an equation to estimate 	<ul style="list-style-type: none"> <u>Literacy:</u> (i) development of vocab – see key word list; (ii) write up of investigation (iii) writing word equations for chemical reactions 	<ul style="list-style-type: none"> <u>Literacy:</u> (i) development of vocab – see key word list; (ii) write up of KMP investigation <u>Numeracy:</u> (i) calculating magnification

Skills	<ul style="list-style-type: none"> • <u>Literacy:</u> (i) development of vocab – see key word list; (ii) write up of letter to a local council explaining why we should use renewable energy resources • <u>Numeracy:</u> (i) recording and plotting data • <u>Working scientifically:</u> (i) make and record accurate observations; (ii) using thermometers, kettles etc. safely; (iv) interpret melting / boiling point data • <u>Practical skills:</u> (i) determining change in temperature values 	<ul style="list-style-type: none"> • <u>Literacy:</u> Use and read research, follow instructions that are written. development of vocab – see key word list; (ii) write up of assessment • <u>Numeracy:</u> Timing how long it takes for seeds to disperse, evaluate data and identify any outliers • <u>Working scientifically:</u> (i) make and record accurate observations; (ii) identifying independent, dependent and control variables as part of planning potential assessment • <u>Practical skills:</u> Creating models of seeds to investigate which is the best for dispersal, ask questions and develop line of enquiry 	<ul style="list-style-type: none"> • <u>Literacy:</u> (i) development of vocab – see key word list; • <u>Numeracy:</u> (i) calculation of tally charts; (ii) calculation of averages • <u>Working scientifically:</u> (i) bar and line graph drawing • <u>Practical skills:</u> 	<ul style="list-style-type: none"> • <u>Literacy:</u> (i) development of vocab – see key word list; (ii) write up of a description of the flight of an airplane • <u>Numeracy:</u> (i) speed/distance/ time calculations • <u>Working scientifically:</u> (i) make and record accurate observations; (ii) using Newtonmeters safely; (iv) taking accurate force measurements • <u>Practical skills:</u> (i) taking accurate force measurements using a Newtonmeter

Science Assessment and Feedback

In Years 7 and 8 students have an assessment within most units that they are taught. These are a variety of different style assessments such as building a model, writing up investigations and providing answers to open ended questions. The work is assessed and assigned a step using moderated department agreed criteria for each assessment. This is recorded on the department assessment spreadsheet.

All students are then formally assessed at the end of each term. These are cumulative assessments and comprise exam – type questions on all the topics taught in that term. These are then marked using a mark scheme and the step assigned using appropriate boundaries. The raw score is recorded on the department assessment spreadsheet. These are then used for data entry. These are used to monitor the overall progress a student is making with wave 1 intervention used with students identified from the cumulative assessment data.

Students are informally assessed every lesson by way of a QUICK 6 (starter) and other in lesson activities to ensure that they are all acquiring skills and knowledge as stated in our intended curriculum.

In all three key stages we use coloured pens as outlined below:

Green pens – teacher marking and feedback

Red pens – young persons' response to TIFs or MRI work following on from a key marked piece.

Purple pens – self and peer assessment and feedback.

The types of feedback evident are:

- Verbal feedback in lessons, particularly during practical work and in question and answer sessions.
- Peer / self-assessment and feedback on some classwork.
- Written / verbal feedback to reinforce expectations in terms of presentation of work, in line with the school policy.
- Key marked work – there is one piece for each unit studied in KS3 (9 in Year 7 and 10 in Year 8). This is marked as stated in the whole school policy with a Wolfreton step assigned. This will be evident in students' exercise books. A key marked piece in the form of exam-type questions is also completed three times a year to assess that term's learning. A Wolfreton step is assigned to this cumulative assessment and it is followed by detailed MRI work.

ART

The home of creativity and imagination

A place to inspire you to: take risks; express your ideas in new ways; develop your cultural awareness; foster resilience;
become empowered; have fun and, above all, flourish.

SoL	Art from other cultures - Day of the Dead	Art from other cultures - Native American and African Art
Knowledge	<p>Students will know about the Mexican Day of the Dead multi-day holiday which focuses on gatherings of family and friends to pray for and remember friends and family members who have died, and help support their spiritual journey.</p> <p>Students will acquire knowledge of materials and artists and how to generate ideas which develop to conclusions.</p>	<p>Students will learn about masks and their significance to differing cultures such as the Native Americans and Africans. They will have a grounding in why different cultures make masks. The history and aesthetics of each chosen culture will be explored. In case of the Native Americans, students will experience a spirit quest to find their animal spirit. Their individual animal spirit will be then made into a mask.</p> <p>Students will acquire knowledge of materials and artists and how to generate ideas which develop to conclusions.</p>
Skills	<p style="text-align: center;">Drawing from observation Basic pencil skills and control Introduction and development of specific formal elements Pen skills Craft skills Design skills Watercolour skills Clay skills (3D) Artist research and literacy development Chalk pastel skills Collage and mixed media Health and safety awareness</p>	<p style="text-align: center;">Understanding another culture (Research and literacy) Design through drawing Craft and Making Skills 3D skills Pattern Watercolour Skills Organisational Skills Health and safety awareness.</p>

Art Assessment and Feedback

Rationale

Feedback and marking are vital parts of the bond between the teacher and the young person. It is within the nature of art and design practiced-based learning that the students will inherently receive a combination of verbal feedback and written assessment.

The purpose of our marking and feedback approach

- To give students the criteria to meet the next step in their learning, at whatever level this may be
- To ensure that students are made aware of their steps to success, at an appropriate level
- To assess whether learning outcomes have been met
- To celebrate success
- To develop self-esteem and confidence
- To develop resilience to constructive criticism
- To establish what skills and knowledge do students have

Verbal feedback

- Is the most regular and interactive form of feedback at KS3. It provides a live, constructive and informative process for students to develop the next steps in their learning journey towards success. This is a powerful mechanism to support progress and achievement due to the immediacy of this format.
- Teacher modelling and demonstrating in every lesson providing guidance for skills, knowledge and understanding. Also contributes towards setting high standards and expectations.
- It will be both direct (targeted to individuals or groups) and indirect (others listen and reflect on what has been said). At times it will be spontaneous and at other times it will be planned based on previous learning and in lesson progress.
- In offering verbal feedback, the teacher will be modelling the subject specific vocabulary that students can use to develop their learning journey. This is specifically pertinent to students looking to develop studies at GCSE level and beyond.
- Verbal feedback will be developmental. It will recognise efforts and achievements and offer specific details of ways forward in relation to the shared learning objectives.

Diagnostic feedback – Key Marked Work

- Diagnostic feedback is an integral part of the improvement process and will be evidenced in sketchbooks using a bespoke assessment grid which supports student improvement and progress. This colour coded grid will be used to cross reference against coloured stickers placed against key work at appropriate intervals. These colours will help students identify clearly where they are now and support the improvements needed to progress to the next Wolfreton assessment step in Art through developing skills, knowledge and further understanding. This will be intrinsically linked to the bespoke nature of the planned activities which at KS3 are designed to provide a platform for further study at GCSE level.

- To support this process further students at the start of key activities will be told the key success criteria of what the teacher will be assessing. This contributes to 'what good looks like' and is supported where appropriate with visual exemplars.

Computing

Understanding the digital world through creativity and coding – a ‘bit’ at a time!

To inspire future generations of creative coders and users in order to be confident, safe and thrive in a global digital economy.

SoL	IT Skills	Multimedia Products	E-Safety	Small Basic - Shapes	Graphics Editing	Small Basic - Quiz
Knowledge	<p>Be able to recall the office address</p> <p>Know what office online is and how to access it</p> <p>Know what Microsoft Teams is and what it is used for</p> <p>Know what Outlook and Word and what they are used for</p> <p>Know what and e-mail is and its properties such as subject, cc, bcc etc..</p> <p>Know what an internet browser is and be able to identify one</p>	<p>Understand the good and bad principles when designing a digital product</p> <p>Know how to break a problem down-Understand the terms purpose and audience and how they impact on a design</p> <p>Be able to recognise the flowchart symbols -Know that a program / algorithm is a list of instructions</p> <p>Know how to use a digital Presentation editor and the different functions thereof</p> <p>Know the key skills to evaluate</p>	<p>Students will learn about issues surrounding internet safety and online dangers.</p> <p>They will learn the common issues and how to avoid them.</p> <p>They will learn how to use the internet safely and give advice.</p> <p>Students will know how to communicate in a respectful manner as not to cause harm to others</p> <p>Students will know the steps that need to be taken in order to stay safe</p> <p>Students will know the SMART rules</p> <p>Students will know how to report abuse</p> <p>Students will be able to recall a range of tools in order to assist them in staying safe such as thinkuknow.co.uk 0800 1111 and the SMART Rules</p>	<p>Students will learn to use the range of available tools to create simple to more complex shapes. Student will need to synthesise mathematical problems with procedural instructions to create shapes. I.e. square, rectangle, triangle, hexagon and so on. Students should be able to use the programming language to create them independently. Use of additional tools to make programs more efficient will be introduced e.g. FOR looping. Students can effectively use the IDE tools, e.g. debug information, to make informed decisions about how to bug fix their programs.</p>	<p>Students will gain an understanding of how industry uses graphics to:</p> <ol style="list-style-type: none"> Advertise Promote Persuade <p>Students will become aware of how to effectively use a range of tools to create a new digital product, calling on creative skills. Students will learn about the purpose and audience of a graphic.</p> <p>They will learn about the IT tools used to develop a digital artefact.</p>	<p>Students will expand on their understanding of coding from the initial topic to gain a knowledge of core programming skills used to create all common apps:</p> <p>-Input / Output</p> <p>-Variables</p> <p>-Selection statements</p> <p>-Iteration</p> <p>They will learn the principles of these constructs in order to build an app for a given purpose using the text window. Students will gain a knowledge of text interfaces in contrast to a graphical user interface.</p>
Skills	<p>How to log onto Wolfreton School Systems</p>	<p>Place in practice good design techniques such as house</p>	<p>Students will be able to recognise danger and when</p>	<p>Students are able to use a Textual Programming language and</p>	<p>Students will learn how to edit images using a graphics editing package and how to</p>	<p>Students are able to apply the constructs independently to create working programs.</p>

	<p>How to use Microsoft Teams in the browser</p> <p>How to use Microsoft OneDrive in the browser</p> <p>How to use Microsoft Outlook in the browser</p> <p>How to use Microsoft Word in the browser</p> <p>Basic understanding of how to navigate the GUI and load some apps</p> <p>Be able to construct a simple e-mail including an attachment</p> <p>Be able to perform simple file management in OneDrive such as creating folders and moving files from Teams into OneDrive</p> <p>Be able to upload documents to OneDrive</p> <p>Be able to use the Application Launcher to load applications in the cloud</p>	<p>style and positioning of objects</p> <p>Recognise the purpose and audience of a given brief and be able to describe how it impacts a design</p> <p>Be able to decompose a problem with regards to a given brief</p> <p>Be able to create / use Flowchart</p> <p>Be able to create / use a Presentation Editor to create a multimedia product</p> <p>Use online tools via Office.com / PowerPoint including multimedia elements such as video, sound and automation</p> <p>Evaluate their own work</p>	<p>they are being manipulated for the benefit of others</p> <p>Students will be able to state what is the best recourse of action for a dangerous situation and how internet safety relates in this situation</p> <p>Understand a range of ways to use technology safely, respectfully, responsibly and securely, including protecting their online identity and privacy</p> <p>Recognise inappropriate content, contact and conduct</p> <p>Be able to report concerns</p> <p>Be able to use tools to set privacy levels to an appropriate level in order to protect their data online</p> <p>Be able to reflect on a situation and give advice to others on how to stay safe.</p>	<p>program flow to draw shapes.</p> <p>They will learn about structure and using correct code for a given purpose.</p> <p>Students will use programming objects and the Turtle – using appropriate turtle commands to create shapes. They will apply basic mathematical knowledge to the computer models.</p> <p>They can use ‘intellisense’ to speed up coding and the correct use of error codes to debug their programs.</p>	<p>saved them in the correct file format.</p> <p>They will learn how to create composite images and manipulate graphics using various tools.</p> <p>They will learn how to plan a poster layout and collect relevant images for the poster.</p> <p>To understand how to use the tools in to create the poster for a given purpose / audience in practice.</p> <p>Students are able to evaluate performance</p>	<p>Students will be taught about program floe and they are able to apply this to write code which executes instructions in the correct order.</p> <p>Students will produce a product for a given purpose using the code concepts they have learned. The product will be a working solution which has some elements of branching and input error checking where appropriate. Students will test their solutions to make sure it works.</p>
--	--	--	--	---	--	---

Computing Assessment and Feedback

Marking and feedback is given on a periodic basis and is based on either a teacher checking or more in-depth analysis. Common errors and misconceptions will be addressed and further opportunities to consolidate new understanding are given immediately as part of the whole class task review. This will range from individual checking to more generic class wide checking / sampling / feedback. This also includes Key Marked Work feedback.

Verbal and written comments will be used informally throughout all lessons in mini plenaries and to review learning. This will include peer feedback & self-reflection.

Periodically, work completed in lessons will be self/peer/teacher marked to support student progress.

Responses will be written in red pen and are an opportunity for the students to show further understanding of the topic studied. These mastery questions can allow an opportunity for whole class/self/peer/teacher assessment and feedback.

KS3 Cohort Assessments will be used as a Key Marked Work and is indicated in the relevant units. The method of assessment and feedback will depend on the assessment type.

DRAMA

Tell the story - step into someone else's shoes

To inspire students to step with confidence. Work with others, be creative, imaginative and reach for the stars!

SoL	What is Drama?	Spooky Tales	Mime and Movement	Peer Pressure	Midsummer Night's Dream	Fairy Tales and the Terrible Fate of Humpty Dumpty - Script
Knowledge	<p>By the end of the unit students will:</p> <ul style="list-style-type: none"> Know the drama rules for safe working Completed a baseline assessment Experienced sharing practical work in front of an audience Be familiar with the Key words - facial expression, body language, still image, thought tracking, communication, co-operation, creativity and concentration. 	<p>By the end of the unit students will:</p> <ul style="list-style-type: none"> Know the story of Mr Pimm and its SMHC context Experience sharing performance work in front of an audience Be familiar with the Key words -, Still image, hot seat, sound scape, narration. Know the importance of voice projection and audience awareness. Understand the themes and content of the poem 'The haunted lift' 	<p>By the end of the unit students will:</p> <ul style="list-style-type: none"> Learn what non-verbal communication is and discover that you can express yourself in other ways than just using words Know how to put detail into mime actions Know what animalistic is Work individually and in groups to create movements & mimes. Identify emotions through body language Know the different types of performance spaces Become familiar with the key words of: Mime, Movement, Detail, Facial expression, Body language 	<p>By the end of the unit students will:</p> <ul style="list-style-type: none"> Know what Peer pressure is & the different forms that it can take Have reflected on their own knowledge and experience of peer pressure Know the possible consequences and reactions to peer pressure Explored different ways of dealing with peer pressure. Students will explore what Peer Pressure is through drama exercises, scripted work and devised work. As much as possible it will be flexible to fit in with their own experiences 	<p>By the end of the unit students will:</p> <ul style="list-style-type: none"> Know who Shakespeare was and be able to identify some of his plays Know basic information about Elizabethan theatre Know the main themes and plot line of Midsummer Night's Dream by watching a film and discussion Have learnt a scripted scene from the play (original language) and performed it in front of an audience Complete a literacy task on the plot of the play 	<p>By the end of the unit students will:</p> <ul style="list-style-type: none"> Know what a fairy tale is and the genre/style Be able to identify themes and characters from fairy tales Know what a moral is and identify the moral in set stories How to work with others to create characters and story lines based on fairy tales Know how to create practical work that explores fairy tales through still images. Role on the wall. Be able to identify the themes and issues in the play Be able to relate these to their prior learning on peer pressure and bullying

						<p>Be able to develop some empathy with the main characters</p> <p>Explore a scripted text, finding meaning through practical exploration</p> <p>Shared ideas with others</p>
Skills	<p>Establish drama rules and routines</p> <p>Adhere to the drama and classroom rules for safe working</p> <p>Answer questions on what I already know about drama through a base line assessment</p> <p>Share practical work in front of the class</p> <p>Learn and understand the key words of facial expression, body language, still image, thought tracking, communication, co-operation, creativity and concentration</p>	<p>Adhere to the drama and classroom rules for safe working</p> <p>Use key words/ drama language of Still image, Hot seat, Narration, Sound Scape in verbal and written work</p> <p>Share ideas with others to create a performance about Mr Pimm.</p> <p>Stay focussed during group rehearsal, following instructions</p> <p>Start to develop voice projection, movement and audience awareness in the Mr Pimm performance in front of an audience</p> <p>Describe the characters and events in the Mr Pimm story,</p> <ul style="list-style-type: none"> • Create an imaginative, practical response to 'The 	<p>Use key words/drama language of mime, movement, focus, facial expression & body language in verbal & written work</p> <p>Share ideas with others to create a performance using mime & movement</p> <p>Stay focussed during group rehearsal, following instructions</p> <p>Start to develop detailed mimes and movement pieces- some to music</p> <p>Identify what makes a good mime</p> <p>Experience creating animalistics</p> <p>Identify emotions from body language</p> <p>Performance in front of an audience & in 'the round'</p>	<p>Use key words/drama language of peer pressure: Stand up for yourself, Empathy, Friends</p> <p>Share and discuss ideas with others to explore different types of peer pressure</p> <p>Be given the opportunity to show an honest and open attitude to supporting each other with peer pressure.</p> <p>Stay focussed during group rehearsal, following instructions</p> <p>Use role play technique to explore different reactions to peer pressure</p> <p>Use empathy & sensitivity when responding through writing in role</p>	<p>Use key words/drama language: Shakespeare, Theatre, Mechanicals, Lovers, Fairies, Dream.</p> <p>Persevere in learning and understanding some of the language of the play</p> <p>Learning lines</p> <p>Exploring the themes and plot in group work and classwork</p> <p>Characterisation techniques through voice, actions, movement and gestures.</p> <p>Creating movements to support a scripted performance</p> <p>Performing in front of an audience</p>	<p>Practice Improvisation skills.</p> <p>Develop Research into fairy-tale stories, Working with others, Imagination</p> <p>Listening and sharing ideas, Performance skills.</p> <p>Develop skills in creating an individual character based on existing fairy tale characters</p> <p>Start to develop Movement, Voice, Body Language and Interaction performance skills</p> <p>Be able to read aloud in front of others</p> <p>Be able to use voice skills to interpret character in front of others with different levels of success</p> <p>Be able to link the themes in the play with prior learning and explore in</p>

		haunted Lift poem				discussion and practical workshop Deepen understanding of the script through short written tasks Develop awareness of script structure and style (flashback)
--	--	----------------------	--	--	--	---

Drama Assessment and Feedback

Students are formatively assessed at the end of each project of work – typically every 6 weeks. Students are assessed in three different skill areas (Performing, Creating and Reflecting) a combination of these assessments will create an overall step level. These are fed back to the students in their Drama Booklets. Students will set targets to improve their work for the next project.

In Drama, marking and feedback is supported through the use of unit booklets. Each unit has an assessment pyramid which tracks the progress through 3 strands: Performance, Creating and Reflecting. Each level within the pyramid equates to the Wolfreton steps. Teachers will sign off the steps achieved in the pyramid so that student can see their strengths and be able to identify areas for improvement (TIF).

Each unit (6-8 lessons) is concluded with a performance which is marked as a Key Marked Work and written feedback is provided by the teacher (WWW and TIF). The students will then respond with an 'MRI' to allow them to celebrate their achievements and reflect on what further performance skills they wish/need to improve on.

Written tasks in the booklets reflect on the students understanding and knowledge gained throughout the unit. This will be 'checked' work with a simple comment and a mark reflected on the assessment pyramid.

Verbal praise and feedback will be given every lesson in response to practical work and this can be in the form of teacher observations or peer assessment.

GEOGRAPHY

Place Matters – Without Geography you are nowhere

To inspire a curiosity about the changing world in which we live. Place Matters. Geography is engaging, interesting, relevant and dynamic.
You will be challenged to think creatively and sustainably in order to address and solve world issues.

SoL	Asia	Europe	Antarctica	Oceania	Africa
Knowledge	<ul style="list-style-type: none"> • What the continent of Asia is like including the different aspects of its human, physical and environmental geography • What the geography of Japan is like • What the monsoons climate is like and how it affects parts of Asia • How tourism contributes to the development of Thailand • Why deforestation is an issue in South East Asia • How China is developing renewable energy with the Three Gorges Dam • How Dubai is a changing place 	<ul style="list-style-type: none"> • What the continent of Europe is like including the different aspects of its human, physical and environmental geography • What the UK climate is like and the reasons for variations in the weather • Brexit – positives, negatives and effects • How air pollution affects Europe. • What the plastic pollution issue is Europe’s coastal regions and how we might solve it • What fracking is and why it might be considered an issue in the UK 	<ul style="list-style-type: none"> • What the continent of Antarctica is like including the different aspects of its physical geography • How humans impact this frozen wilderness • What Antarctica’s climate is like and the reasons behind it being cold and dry • The impacts of tourism on the continent and if it is sustainable • What the effect of climate change is on Antarctica • What the Antarctic Treaty is and how it protects the continent • What the future might hold for Antarctica 	<ul style="list-style-type: none"> • What the continent of Oceania is like including the different aspects of its physical, human and environmental geography • Why migration occurs, push and pull factors and trends in Oceania • Why wildfires occur and the impacts of recent wildfires in Australia • What the Maori culture is and the impact of western culture on New Zealand’s Maori people • How climate change is affecting the Great Barrier Reef • Why migration is managed and about Australia’s immigration system • What the future holds for places such as Tuvalu 	<ul style="list-style-type: none"> • What the continent of Africa is like including different aspects of its physical human and environmental geography • What Africa’s relief is like, and the different climate zones across Africa • The challenges faced in the Horn of Africa • What life in Lagos is like – the challenges and opportunities • What the causes and effects of desertification are and how it is affecting the Sahel • How desertification in the Sahel can be managed • How technology including mobile phones can help the continent’s development
Skills	<ul style="list-style-type: none"> • Students will develop skills in reading and interpreting a range of graphs, maps and images. They will learn how to examine information to be able to explain and evaluate contemporary issues. • Students will understand how to apply these skills: to being able to use and interpret a range of resources and apply their knowledge to a range of commands. 				

Geography Assessment and Feedback

Year 7 PLACE – Students will complete six units (Why Geography Matters, Asia, Europe, Antarctica, Oceania, Africa).

Each unit has a formal end-of-unit exam (completed in exam conditions). This will be teacher-marked in detail and feed-forward MRI will take place after the assessment.

Students will also complete a Baseline Assessment, TCAT Consortium Assessment and Y7 End-Of-Year Exam. All lessons follow the same structure – class work will be teacher, peer and self-assessed where appropriate. Homework projects will be set for each unit and teacher assessed using effort numbers.

- Class work will be briefly checked by the teacher (ticks only).
- Extended tasks may include teacher WWW/TIF comments if appropriate.
- Homework is topic-based and will be a research project each half term.
- This will be effort-marked (1-5) and will include an overall WWW/TIF comment.

HISTORY

Bringing the past to life.

To inspire and ignite a passion for who we are and where we came from. To promote curiosity and understanding of events of the past.

SoL	Historical skills and terms – Pre 1066: Romans	1066 and Norman Conquest	Castles and Norman Methods of Control	Medieval Life and Religion and Magna Carta	Murder of Thomas Beckett

History Assessment and Feedback

Students are formatively assessed throughout each topic using Low Stakes Tests and Assessment for Learning strategies. These are then peer-assessed/self-assessed these will provide useful to look at strengths and weakness in their exercise books to inform teacher judgement for data trawls. Each half term students in years 7, 8 and 9 complete an end of topic cumulative assessment based on the topic they have been studying. They will complete an end of year exam covering all topics studied in that year. There will be 6 summative assessments throughout Years 7, 8 and 9.

Tracker sheets will be placed at the front of exercise books and will be completed after each Key Marked Piece.

Marking and feedback will be given on a regular basis. Work completed in lessons will be check marked, although not all work need be checked. Verbal feedback will be used regularly to give immediate feedback, this will most likely be in the form of whole class feedback. Opportunities to undertake self and peer assessment can be used when it is beneficial to do so. Feed forward in the form of TIF questions will be used to encourage students to improve their understanding. LST will be used to embed long term memory skills.

One Key Marked Work will be assessed each half term, totally 6 KMW in the academic year including the end of year exam/PPE. Where PPEs are a substantial number of exam questions they will count for 2 KMW. Department WWW/TIF statements will be utilised to give specific feedback alongside an individual WWW and TIF comment. TIF would most likely come in the form of a question for students to answer as part of their 'My Response Is'.

Home Learning tasks should be checked and given an effort grade of 1-5.

FRENCH

Learn a language. Stand out!

To inspire a passion for and create awareness of different cultures. To develop resilience, confidence and courage and enable you to stand out from the crowd and to embrace difference.

---------------	--	--	---	---	---	---

French Assessment and Feedback

In Key Stage 3 there is a continual assessment approach. Students can expect vocabulary testing most weeks of the term. Students will be given a list of the key vocabulary for each topic to be covered during a specific half term and to support memory learning, regular testing of this vocabulary will be carried out. The number of words will increase as we move through years 7, 8 and 9 in preparation and support of GCSE.

In addition, at the end of each half term there will be a cumulative assessment based on one of the 4 key skills that are assessed when learning a modern foreign language namely: listening, reading, writing or speaking. We test these in rotation to ensure a good coverage of each skill.

In addition, in year 7 there is a pronunciation assessment in the first 6 weeks of the half term to ensure there is a solid foundation and understanding of the key sounds of French/Spanish.

Feedback is typically given using a whole class feedback sheet picking out the main strengths and weaknesses of the class. Praise is given to good pieces of work and there is sharing of good practice. Common errors are worked on. Students will also receive individual feedback in terms of scores for comprehension tasks and a Wolfreton step. For writing and speaking students will receive several comments in terms of strengths and weaknesses

Books

- Regularly checked (expectation every 2/3 weeks)

To include, ticks, simple corrections, stickers/stamps, if felt appropriate www/TIF but does not need to be routine. MRI in red pen can be used but again does not need to be routine, Praise, challenging presentation issues.

Listening and reading

- Students can self/peer assess for immediate feedback and to obtain the final grade//outcome.
- Teacher to collect in Key Marked Work to check accuracy of marking, record the outcome and to provide feedback on common vocab/technique errors. Students are expected to review and learn vocabulary not known. There may be certain questions that the class have struggled with so these need to be addressed as part of MRI/corrections.
- A retest of any unknown vocabulary should then take place to consolidate the learning. An optional suggestion is to use a whole class feedback sheet.
- There should be a brief teacher comment on each piece e.g. a fabulous test, well done.

Writing and speaking

- Teacher is to annotate work, highlighting common errors that students are expected to correct in red pen.

- A departmental whole class feedback sheets are recommended so teacher can comment on common errors and also share examples of good practice from certain students.
- Students are to complete a full MRI on this feedback – correcting errors and trying out a new idea to help them make progress next time.

---------------	--	---	---	--	--	---

Spanish Assessment and Feedback

In Key Stage 3 there is a continual assessment approach. Students can expect vocabulary testing most weeks of the term. Students will be given a list of the key vocabulary for each topic to be covered during a specific half term and to support memory learning, regular testing of this vocabulary will be carried out. The number of words will increase as we move through years 7, 8 and 9 in preparation and support of GCSE.

In addition, at the end of each half term there will be a cumulative assessment based on one of the 4 key skills that are assessed when learning a modern foreign language namely: listening, reading, writing or speaking. We test these in rotation to ensure a good coverage of each skill.

In addition, in year 7 there is a pronunciation assessment in the first 6 weeks of the half term to ensure there is a solid foundation and understanding of the key sounds of French/Spanish.

Feedback is typically given using a whole class feedback sheet picking out the main strengths and weaknesses of the class. Praise is given to good pieces of work and there is sharing of good practice. Common errors are worked on. Students will also receive individual feedback in terms of scores for comprehension tasks and a Wolfreton step. For writing and speaking students will receive several comments in terms of strengths and weaknesses

Books

- Regularly checked (expectation every 2/3 weeks)

To include, ticks, simple corrections, stickers/stamps, If felt appropriate www/TIF but does not need to be routine. MRI in red pen can be used but again does not need to be routine, Praise, challenging presentation issues.

Listening and reading

- Students can self/peer assess for immediate feedback and to obtain the final grade//outcome.
- Teacher to collect in KMW to check accuracy of marking, record the outcome and to provide feedback on common vocab/technique errors. Students are expected to review and learn vocabulary not known. There may be certain questions that the class have struggled with so these need to be addressed as part of MRI/corrections.
- A retest of any unknown vocabulary should then take place to consolidate the learning. An optional suggestion is to use a whole class feedback sheet.
- There should be a brief teacher comment on each piece e.g. a fabulous test, well done.

Writing and speaking

- Teacher is to annotate work, highlighting common errors that students are expected to correct in red pen.

- A departmental whole class feedback sheets are recommended so teacher can comment on common errors and also share examples of good practice from certain students.

Students are to complete a full MRI on this feedback – correcting errors and trying out a new idea to help them make progress next time.

MUSIC

Where words fail, music speaks

To promote positivity, self-confidence, self-worth and community. To foster a life-long interest and awareness of different types of music. To develop a learning of the world around you, through music, which is found in every culture across the world.

SoL – units can rotate	Using Your Voice	Rhythms of the World	Guitar I	Keyboard Skills	Programme Music	Mysterious Music
Knowledge	<ul style="list-style-type: none"> An understanding of the elements of music An understanding of how to perform vocally An understanding of correct singing technique An understanding of how to create/compose a piece of music. 	<ul style="list-style-type: none"> An understanding of the elements of music An understanding of music notation An understanding of correct drum technique An understanding of rhythmical device (syncopation etc) 	<ul style="list-style-type: none"> An understanding of the elements of music An understanding of music notation (chord diagrams and lead sheets) An understanding of correct guitar technique Knowledge of chord names and guitar parts Knowledge of note locations on a guitar 	<ul style="list-style-type: none"> To know where the keyboard notes are / Geography of the keyboard To know that the note head is the factor in determining the contour of the pitch To know that melody should be played with the right hand (in this case) in order that the left hand can be used for an additional part, and so that melodic playing is smoother 	<ul style="list-style-type: none"> To know that a piece of music can create imagery and mood To know how to use the musical elements to create feelings / mood / ambience through music To know what an ostinato and motif are To be able to use successfully contrasting musical elements to portray a story full of emotions To build on previous units to solidify knowledge of the musical elements How to use: Chromatic movement, dissonance and clusters 	<ul style="list-style-type: none"> To know that a piece of music can create imagery and mood To know how to use the musical elements to create feelings / mood / ambience through music To know what a diminished 7th chord is To know how to use: Chromatic movement, pitch contrast

Music Assessment and Feedback

Rationale

Feedback and unit assessments are vital parts of the music curriculum. It is within the nature of music that the majority of feedback in the practical nature of the subject, will be verbal with end of unit assessment.

In KS3 we use the Music Wolfreton Steps overview to underpin the key strands of Performing, Composing and Listening/Understanding.

Each individual unit has its own bespoke 'assessment pyramid sheet', which is more individualised to the specifics of the instrument/genre being studied. Students will write an MRI comment according to verbal/peer feedback.

The purpose of our 'pyramids'.

- To give students the criteria to meet the next step in their learning, at whatever level this may be
- To ensure that the students are made aware of their steps to success, at an appropriate level – to show a quick visual reference of this.
- To assess whether learning outcomes have been met
- To show strengths and areas for development
- To celebrate success
- To develop self-esteem and confidence
- To develop resilience to constructive criticism
- To establish what skills and knowledge students have

Verbal feedback

- Is the most regular and interactive form of feedback at both KS3, KS4 and KS5. It provides a live, constructive and informative process for students to develop the next steps in their learning journey towards success. This is a powerful mechanism to support progress and achievement due to the immediacy of this format. This 'live feedback' is the most important to the Music Department. Giving feedback to 'live music', which happens in a set period of time, requires immediate response.
- Teacher modelling and demonstrating in most lessons providing guidance for skills, knowledge and understanding. Also contributes towards setting high standards and expectations.
- It will be both direct (targeted to individuals or groups) and indirect (others listen and reflect on what has been said). At times it will be spontaneous and at other times it will be planned based on previous learning and in lesson progress.
- In offering verbal feedback, the teacher will be modelling the subject specific vocabulary that students can use to develop their learning journey. This is specifically pertinent to students looking to develop studies at GCSE level and beyond.
- Verbal feedback will be developmental. It will recognise efforts and achievements and offer specific details of ways forward in relation to the shared learning objectives.

Written feedback – Key Marked Work

As previously touched upon:

In KS3 we use the Music Wolfreton Steps overview to underpin the key strands of Performing, Composing and Listening/Understanding.

Each individual unit has its own bespoke 'assessment pyramid sheet', which is more individualised to the specifics of the instrument/genre being studied. Students will write an MRI comment according to verbal/peer feedback.

PHYSICAL EDUCATION

Fitter, healthier, happier

Physical Education inspires lifelong enjoyment and understanding of a range of sporting physical activities
developing well-being, independence, confidence and collaborative skills.

Physical Education Assessment and Feedback

In Key Stage 3, students are assessed at the end of each block of work – typically every half term. At the end of each block learners can highlight one agreed area of strength (WWW) and one agreed area they need to focus on to improve further (TIF).

These WWWs and TIFs will either be based on technical or tactical areas of each sport. Using the Wolfreton 'Steps' teaching staff will make a judgement on a young persons' performance in each sport based on their tactical (40%), technical (40%) and physical (20%) proficiency.

Students will focus on the WWW and TIF to understand what the need to do to make progress.

Students will be assessed after each block of practical work and graded based on their:

Technical (40%)

Tactical (40%)

Physical (20%)

performance in each sport.

Feedback will consist of a comment in the planner, a TIF(To Improve Further), agreed by the member of staff highlighting which of the three 'Steps' the young person needs to improve.

RELIGIOUS STUDIES

Being unique and celebrating a world of difference.

To explore the advantages and evolving challenges of living in multi-ethnic/faith Britain. Encouraging learners to develop their own values, identity and sense of belonging whilst celebrating difference between cultures and religions. The study of Society and Ethics provides an environment through which students can develop tolerance and sensitivity towards a broad range of controversial issues and misconceptions.

SoL	Christianity	Islam	Sikhism	Buddhism
Knowledge	<ul style="list-style-type: none"> • History of Christianity – what happened after Jesus died? • Key Christian teachings and values • Jesus – historical evidence, his life, impact on society • Church – internal / external features, worship, importance • Bible – historical evidence, parables, The Prodigal Son • Creation – Christian beliefs about creation of the universe and humanity, story of Adam and Eve, links to good and evil • Festivals – Christmas and Easter story • Life after death – Heaven, hell, judgement day • Pilgrimage – Miracles, Lourdes, South of France • Women in the church – equality, sexism, first female Bishop in the UK • Animals – how humans use animals, animal testing, animals for food, sport, entertainment etc. and Christian views on animals, stewardship and dominion 	<ul style="list-style-type: none"> • The Life of Muhammad – how the religion of Islam began • The Mosque – history, external/internal feature and importance • The Qur’an – history, teachings and importance • Bilal – how Bilal showed courage and why he is still significant today • Muslim Beliefs in Life After Death – what happens to the body and soul and how this affects how a Muslim lives • The Five Pillars of Islam – statement of faith, prayer, charity, fasting and pilgrimage • Eid – how and why it is celebrated by Muslims • Pilgrimage – the history, why they travel to Mecca, what they do there and why it is important • Malala – how she showed courage and how she still impacts upon the world today • Muslim Aid – how the charity helps people in need all around the world and why 	<ul style="list-style-type: none"> • The Gurus - the life of Guru Nanak and how/why Sikhism was created. Religious Studies Assessment and Feedback

In Year 7 students complete 4 assessments including their end of year exam.

Key Marked Work 1 encourages students to consider ultimate questions and then choose one they are interested in so they can research some different religious responses to it as well as explain their own opinion.

Key Marked Work 2 assesses retention on what they have learnt about the religion of Christianity up to this point. The assessment follows Blooms' style written questions with students showing skills such as identify, describe, explain, evaluate.

Key Marked Work 3 is an information retrieval style assessment where students are given information about Muslim beliefs about life after death and firstly have to identify and place images in the correct order to show the beliefs, secondly describe their beliefs, thirdly explain why they believe this and as a challenge show any differences in beliefs and where they come from.

Key Marked Work 4 is the end of year exam which uses Blooms' style written questions to assess knowledge of their past year's learning including Hajj, the Khalsa, the life of Prince Siddhartha. Students will receive a feedback sheet with a question for improvement for all KMPs and they will answer this in red pen to show these improvements.

Tracker sheets will be placed at the front of exercise books and will be completed after each piece of Key Marked Work.

Marking and feedback will be given on a regular basis. Work completed in lessons will be check marked, although not all work need be checked. Verbal feedback will be used regularly to give immediate feedback, this will most likely be in the form of whole class feedback. Opportunities to undertake self and peer assessment can be used when it is beneficial to do so. Feed forward in the form of TIF questions will be used to encourage students to improve their understanding. Low Stakes Tests will be used to embed long term memory skills.

Home Learning tasks will vary between set activities and completing unfinished work in class. Students will complete a homework booklet throughout the year which will be check marked and given a effort grade alongside WWW/TIF comments for students to respond to as part of their MRI.

PSHE

Learn it. Live it.

PSHE is a high impact course that enables students to reach their full potential by developing knowledge, skills and attributes necessary to thrive as global citizens. PSHE provides students with the capacity to make responsible decisions and manage many of the most critical challenges and opportunities life can present. PSHE provides a platform that gives every student the opportunity to be safe and successful within the ever-changing landscapes of today's society

SoL	Introduction to PSHE	British Values	Healthy Relationships	Careers	E Safety	Healthy Lifestyles
Knowledge	Why is PSHE important? What are the three key themes of PSHE? (Personal/social/physical) What factors can be categorised in to the different PSHE themes? What is the Importance of Health and Wellbeing? Who am I? What is personal identity? Importance of Identity? What influences our identity? How does our identity change overtime? How have migrants have become a part of the British identity? How to be successful at Wolfreton School? How can be more resilient?	What does it mean to be British? What are the different British Values? What is Democracy? What is tolerance? Are Rules meant to be broken?	How are Healthy relationships constructed? What makes a good friend? How can I avoid unhealthy relationships? What are dangerous relationships? How can we keep safe and Positive relationships? What is bullying? Why do people bully? How can we prevent bullying?	Why is education important? What opportunities are created by education? What does your future look like? What is success? What are personal qualities? Why are employability skills important?	What is Esafety? What are the social and mental impacts of technology? What is the digital footprint? How and why are we tracked? How can we manage our digital footprint? What is cyberbullying? How can cyberbullying be prevented? How can the media influence our body?	What is personal hygiene? What is the importance of hygiene? What is puberty? How does puberty affect our personal hygiene? What are the different emotions we experience? What are periods?
Skills	Students will apply their knowledge and understanding of PSHE to become better global citizens Apply a range of self-care strategies Develop a sense of identity Develop resilience	Develop an understanding of the different British Values	Develop safe and successful relationships Identify dangerous and unhealthy relationships Managing situations that involve bullying	Identify the opportunities education creates Looking to the future and planning a career Understanding the measures of success	Develop an awareness of the dangers of online environments Steps that can be taken to stay safe Cyberbullying prevention	Develop an awareness of the fundamental aspects of healthy living Develop an understanding of the impacts of puberty

				Identifying the different personal qualities that support different career paths	Reduce the social impacts of online material	
--	--	--	--	--	--	--

PSHE Assessment and Feedback

Feedback and assessment in PSHE are a vital component of the teaching and learning journey across KS3 and KS4. We as a department, strive to provide feedback and assess students in a multitude of ways. This will inevitably produce young adults who are equipped to thrive within our everchanging landscapes of today’s society.

Verbal Feedback

Verbal feedback will be used regularly to give immediate and interactive feedback at both KS3 and KS4. It provides teachers and students with the opportunity to expand the parameters of the teaching and learning experience whilst challenging misconceptions. Verbal feedback in PSHE reinforces high standards and expectations whilst promoting positive outcomes. Effective questioning is used to assess the knowledge and skills established. Learning stages can be sign-posted, thus enabling our students to understand the next step in their learning journey.

Written Feedback

As a department we have set out clear expectations on the marking of exercise books. Work will be marked regularly and consistently across all of KS3 and KS4 to inform a robust teaching and learning experience. A range of strategies are deployed in the form of Low Stakes Testing (LST), self-assessment and peer assessment. This will highlight strengths and weaknesses to inform teacher judgement and future learning. WWWs/TIFs are used to reinforce praise and provide constructive feedback to our students.

Reliable written feedback will ensure:

- The school’s policy on feedback is adhered to
- Consistent feedback is provided informing learners, teachers and parents
- The prescribed knowledge and skills have been established
- Engrained misconceptions are challenged and addressed
- High standards and levels of expectations are promoted and celebrated
- Encouragement and reward are provided to motivate, engage and boost self-confidence
- Promote resilience, self-awareness, self-development and self-management

DESIGN AND TECHNOLOGY

Real problems solved!

Design Technology is an inspiring, rigorous and practical subject. Using creativity and imagination, students design, develop, model and manufacture products that solve real and relevant problems within a variety of contexts considering their own and others' needs, wants and values. High quality design and technology education makes an essential contribution to the creativity, culture, wealth and well-being of the nation.

SoL	Resistant Materials - Lamp	Graphics - Isometric and Perspective	Textiles - Juggling Animal	Food - Healthy Eating
Knowledge	<p>Students will:</p> <ul style="list-style-type: none"> • Learn about the basic components that make up the circuit, they will also learn how to populate and solder the PCB • Develop a range of design ideas working on their sketching and rendering skills. • Develop models to test their ideas and overcome problems • Produce a diary of their making to show the key concepts covered and evidence the progress they have made • Learn to use a range of materials and manufacturing techniques to produce an attractive product • Present their work in a portfolio of evidence similar to how a designer would or similar to how they would in further education 	<p>Students will:</p> <ul style="list-style-type: none"> • Experience graphic products • Learn how to use a pencil to sketch objects using freehand and technical drawing skills • Learn how to apply shading to objects to show tone and texture • Learn how to draw shapes and objects in 3D using 1pt and 2pt perspective • Learn to draw in 3D isometric, using grid paper and iso sketch tools 	<p>Students will:</p> <ul style="list-style-type: none"> • Grasp the order of a design and make project • Design brief, task analysis, design, use of existing products to aid development, pattern cutting/making, practical work, step by step, quality control/checks and evaluation • Gain knowledge of relevance and how each is carried out • Identify design criteria, have knowledge of the workings, threading and safety of the sewing machine, be able to hand sew on an item (fabric, button bead etc.) • Understand fabric construction and properties 	<ul style="list-style-type: none"> • Personal Hygiene: Hair, jewellery, apron, handwashing, covering cuts & coughing • Healthy Eating: Each section on the Eatwell Guide. Apply knowledge to given scenarios to make recommendations • Food Safety: Students to learn about conditions bacteria need to survive and temperatures on the germometer. Best before /Use by dates. Safe storage of food to prevent cross contamination • Functions of Ingredients: learn the function of ingredients in each recipe • Fairtrade: Students to understand and explain the term 'Fair trade' • Food Miles: How food miles affect the environment & ways to reduce in relation to using British fruits in crumble • Vegetarian: Different types of vegetarian diets and reasons why some consumers make this choice, e.g., animal welfare issues or religious beliefs

Skills	<p><u>Practical skills:</u></p> <ul style="list-style-type: none"> • Cutting/smoothing wood and plastic – to change shape scroll saw and pillar drill, examples provided) • Soldering components to a circuit • Marking out / accuracy • Bending acrylic on the line bender • Safe use of the pillar drill, buffer, scroll saw, sander and solder irons • Health and safety in the workshop / Machines <p><u>Design / Theory skills:</u></p> <ul style="list-style-type: none"> • Designing views of the lamp including annotation and rendering • Theory/knowledge timber and Polymers and the effects on the environment, challenge: information /research collated e.g., properties, polymer chains, environmental risk) • Theory knowledge electronic components • Key Words Literacy • Analysis of existing lamps 	<ul style="list-style-type: none"> • Presentation skills – how to neatly present your work • Five rules when applying colour • 1 point perspective – cubes/cuboids Challenge - NAME • 2-point perspective – cube/cuboid Challenge – LETTERS • Isometric drawing – cube/cuboid - • Rendering • Thick/Thin lines 	<ul style="list-style-type: none"> • Students will have a competent understanding of textile technology; they will be able to identify health and safety rules and follow them correctly. They will have a grasp of the following points within a design project- design brief, task analysis, design criteria, product analysis step by step (diary of making), development and modifications; understanding the order and importance of each • The project requires students to be able to thread a sewing machine, (top and spool thread), competently and safely use a sewing machine, turn a hem, hand embroidery and sew on a button • They will have an understanding of quality control and checks when completing practical work. • Other skills included- identification of fabric origin and construction. 	<p><u>Practical skills:</u></p> <ul style="list-style-type: none"> • Weighing and measuring. • Bridge & Claw method – e.g., fruit, vegetables etc. • Peeling, slicing, julienne strips, chopping, grating, spreading, shaping, crushing, sieving. • Washing up! <p><u>Equipment:</u></p> <ul style="list-style-type: none"> • Grill, hob and oven. Kettle, electric can opener and food processor. Fridge 0-5°C. • Preparation / Cooking Methods • Melting method, rubbing in method, baking, batter mixture. <p>Recipes:</p> <ul style="list-style-type: none"> • Dip & Dippers, Croque Monsieur, Flapjack, Kofta Kebabs, Rocky Road, Apple Crumble, Cheese & Onion Muffins, Vegetable Couscous Salad.

Design Technology Assessment and Feedback

Rationale

Feedback and marking are vital parts of the bond between the teacher and the young person. It is within the nature of Design Technology (practiced-based learning and theory) that you will inherently receive a combination of verbal feedback and written assessment.

The purpose of our marking and feedback approach

- To give students the criteria to meet the next step in their learning, at whatever level this may be
- To ensure that students are made aware of their steps to success, at an appropriate level
- To celebrate success
- To develop self-esteem and confidence
- To develop resilience to constructive criticism
- To establish what skills and knowledge the students have

Verbal feedback

- Is the most regular and interactive form of feedback at both KS3 and KS4. It provides a live, constructive and informative process to develop the next steps in their learning journey towards success.
- Teacher modelling and demonstrating in every lesson providing guidance for skills, knowledge and understanding. Also contributes towards setting high standards and expectations.
- In offering verbal feedback, the teacher will be modelling the subject specific vocabulary that students can use to develop their learning journey. This is specifically pertinent to students looking to develop studies at GCSE level and beyond.
- Verbal feedback will be developmental. It will recognise efforts and achievements and offer specific details of ways forward in relation to the shared learning objectives.

Written feedback – Key Marked Work

- Written feedback is an integral part of the improvement process and will be evidenced with KMW cover sheets. This includes steps (KS3)/mark schemes assessment (KS4), highlighting WWW (what went well) which acts as success criteria and TIF (To Improve Further) which supports improvements. KMW cover sheet, where possible are given to students at the start of the activity so they have clear understanding of what the teacher will be assessing. This contributes to ‘what good looks like’ and supported where appropriate with visual exemplars.
- At the end of a project teachers will provide a written summative feedback sheet which will provide a detailed appraisal and provide an opportunity to improve work moving forwards.

Year 7 and 8 These subjects rotate every 9/10 weeks have two lessons a week with lessons being single lessons delivered mostly by the same teachers on different days of the week, although there are some shared groups.

Year 9 will choose one of the Technologies and study this one lesson a week for the full school year. They have an opportunity to choose a second Technology subject, different to their first choice.
